The Group achieved a positive turnaround in its performance with a pre-tax profit of RM10.66 million in the 2<sup>nd</sup> quarter of 2009 compared with a pre-tax loss of RM9.16 million recorded in the preceding quarter.

The turnaround in the 2<sup>nd</sup> quarter 2009 was mainly contributed by better results in the Malaysian operations arising from increased tin volume and higher tin prices. The Indonesian operations also performed better arising from cost rationalization and reduction measures aided further by the higher tin prices.

25. **Review of Performance of the Company and its Principal Subsidiaries**

Group pre-tax profit for 2<sup>nd</sup> quarter 2009 of RM10.66 million was 31.8% higher than the pre-tax profit of RM8.088 million for the corresponding quarter of the previous year mainly contributed by reasons stated in Note 24 above.

Group pre-tax profit for the 1<sup>st</sup> half year of RM1.51 million was much lower than the pre-tax profit of RM33.56 million for the corresponding period of the previous year mainly due to losses incurred in the Indonesian operations. However, the Malaysian operations achieved satisfactory performance in the 1<sup>st</sup> half year in spite of the difficult market conditions.

No item, transaction or event of a material and unusual nature has arisen which would affect substantially the results of the operations of the Group from the end of the 2<sup>nd</sup> quarter 2009 to the date of this announcement.
